

# Outbound Outreach Flows

## 01 RESTAURANTS

Placeholders: {FirstName}, {RestaurantName}, {Area}, {YourName}

### WITH EMAIL + WHATSAPP FLOW

**DAY 1**  
EMAIL

**Pattern Break - Make the pain personal**

#### SUBJECT LINE OPTIONS

A quick question about {RestaurantName}, {FirstName}  
While you were busy on the floor last night...  
How many calls did {RestaurantName} miss this week?

#### VERSION A - OBSERVATIONAL (RECOMMENDED)

Hi {FirstName},

I was checking out {RestaurantName} before reaching out and it looks like a place that stays busy.

Quick question, and I promise it's a short one

When service is in full swing and your team is in the weeds what happens to the calls coming in?

I have been speaking with restaurant owners around {Area}, and the answer is almost always the same.

The phone rings. Nobody gets to it. The caller doesn't leave a message.

They book somewhere else.

Just curious if that's something you deal with at {RestaurantName} or if you've figured out a way around it.

{YourName}

#### VERSION B - DIRECT

Hi {FirstName},

Short question about {RestaurantName}:

During a busy dinner service, how many incoming calls actually get picked up?

Most restaurant owners I speak with tell me honestly probably not all of them.  
And the ones that don't get answered? They rarely come back.

Worth a quick conversation if this sounds familiar. {YourName}

#### CONDITIONAL LOGIC

- Opened only → Continue to Day 2 WhatsApp (soft version)
- Not opened → Day 3 Email with new subject line

#### DAY 2 WHATSAPP

#### Conversation Entry - Low friction, human tone

#### IF COLD (NO EMAIL ENGAGEMENT)

Hi {FirstName}, it's {YourName} I sent you a quick email about {RestaurantName}.

One question: when service gets busy, do most calls get picked up or does it get tricky?

#### IF OPENED OR CLICKED EMAIL

Hey {FirstName} - following up on my email.

Quick one: Would you say missed calls during service are costing you reservations, or have you got it under control?

#### CONDITIONAL LOGIC

- Reply → STOP automation, move to manual conversation
- Seen, no reply → Day 3 nudge

#### DAY 3 WHATSAPP

#### Light Nudge - Stay human, stay curious

Hey {FirstName} not chasing, I promise 😊

I keep hearing the same thing from restaurants around {Area} peak hours are when it falls apart.  
Just wondering if it's the same story at {RestaurantName}.

#### DAY 4 EMAIL

#### Impact Layer - Make the cost feel real

#### SUBJECT LINE OPTIONS

What happens after a missed call at a restaurant  
The booking that never happened  
This is what an unanswered call actually costs

#### EMAIL BODY

Hi {FirstName},

Something I come back to a lot in conversations with restaurant owners:

When someone calls to book a table and no one picks up they don't wait.  
They don't try again. They don't leave a voicemail.  
They open a tab, find the next option, and book there instead.

What makes this hard to track is that it happens during the exact moments when you're busiest.  
So you never see the missed call turn into a missed booking. It just disappears.

Research shows 85% of callers who can't reach a business the first time never try again.  
For a restaurant doing 20 covers a night, even two missed bookings a week adds up fast.

That's the only reason I've been reaching out.

{YourName}

**DAY 5**  
WHATSAPP

**Solution Push - Move from awareness to conversation**

#### IF COLD LEAD

Out of curiosity, has anyone shown you how some restaurants are now making sure every call gets answered during service, without interrupting the team?

#### IF ENGAGED LEAD

That's exactly the problem a few restaurants I work with decided to fix.

They set up an AI voice assistant that picks up every call during service books the table, handles the reservation, sends a confirmation.

Team doesn't need to stop what they're doing.

Happy to show you a quick example if you're curious.

#### CONDITIONAL LOGIC

→ Engagement → Day 6 direct close

→ Cold → Day 6 soft exit

**DAY 6**

WHATSAPP + CALL

**Final Step - Close or exit cleanly****IF WARM LEAD**

Hey {FirstName}, I'll keep it simple.

I can walk you through in 10 minutes exactly how restaurants like {RestaurantName} are making sure no reservation gets missed.

No sales pitch just a concrete example.

Worth a quick call this week?

**IF COLD LEAD — EXIT MESSAGE**

All good, {FirstName}, I won't keep messaging 😊

If missed calls during service ever become something you want to look at, feel free to reach back out.

**NO EMAIL FLOW - WHATSAPP ONLY****DAY 1**

WHATSAPP

**First Touch - Start a conversation, not a pitch**

Hi {FirstName}, quick one,

When {RestaurantName} is flat out during service, do most incoming calls still get picked up?

**DAY 2**

WHATSAPP

**Soft Follow-Up**

Just checking in been asking this to a few restaurants around {Area}.

Most say peak hours are when it gets difficult. Is it the same for you?

**DAY 3**

CALL + WHATSAPP

**Attempt Call - Drop message if no answer**

Tried calling quickly - nothing urgent 😊

Just wanted to hear how you handle calls when the floor is packed.

**DAY 4**  
WHATSAPP

**Value Hook - Introduce the consequence**

Something worth knowing: 85% of people who don't get an answer at a restaurant don't try again. They just go elsewhere. No message, no callback.

For a busy restaurant, that adds up to a lot of invisible lost bookings.

**DAY 5**  
WHATSAPP

**Solution Angle - Keep it simple**

Some restaurants are now making sure every call gets answered automatically during service without the team having to stop.

Not sure if that's something you've looked at, but it's making a real difference for a few places I work with.

**DAY 6**  
WHATSAPP

**Soft Exit - Leave the door open**

All good if it's not relevant right now 😊

Just thought it was worth asking. Feel free to reach out if you ever want to explore it.

## 02 AUTO GARAGES

Placeholders: {FirstName}, {GarageName}, {City}, {YourName}

### WITH EMAIL + WHATSAPP FLOW

**DAY 1**  
EMAIL

**Problem Trigger - Missed service calls**

**SUBJECT LINE OPTIONS**

Quick question about {GarageName}  
When you're working on car, who's answering the phone?  
Do missed calls cost garages in {City}?

**VERSION A — REAL SITUATION**

Hi {FirstName},

I came across {GarageName} and had one question before reaching out:

When you're in the middle of a job hands under the bonnet, car on the lift and the phone rings, what happens?

I've been speaking with garage owners across {City}, and most say the same thing: if they can't get to it, it goes to voicemail. And the caller? Usually doesn't leave one.

They just call the next garage on the list.

Just wondering how it works at {GarageName}.

{YourName}

#### VERSION B — SHORT & DIRECT

Hi {FirstName},

When you're busy in the workshop, how many incoming calls actually get picked up?

Most garage owners I speak with are honest about it some get missed. And every missed call is potentially a job that went to a competitor.

Worth a quick conversation if this sounds familiar.

{YourName}

#### CONDITIONAL LOGIC

→ Opened → WhatsApp Day 2, standard tone

→ Not opened → Resend Day 3 with new subject

**DAY 2**  
WHATSAPP

**Conversation Entry — Operational check**

#### IF COLD

Hi {FirstName}, it's {YourName}, sent you a quick email about {GarageName}.  
When you're busy in the workshop, do calls usually get picked up or do they slip through?

#### IF ENGAGED

Hey {FirstName}, following up on my email.  
Do you feel like missed calls are costing you jobs, or have you got a handle on it?

**DAY 3**  
EMAIL

**Revenue Layer - Make the loss tangible**

**SUBJECT LINE OPTIONS**

The job that never came in  
Missed calls = missed revenue - here's why  
What a quiet phone really means for a garage

**EMAIL BODY**

Hi {FirstName},

Something I've been looking at with garages specifically:

A missed call isn't just a missed conversation.  
It's a tyre change, a service booking, a diagnostic job that went to someone else.

The tricky part? It almost always happens when you're busiest.  
So there's no moment where you notice it. The phone rings, no one gets to it, and the customer is already gone.

For a workshop doing 8–10 jobs a week, even losing one or two enquiries adds up to thousands over the year.

That's why I reached out.

{YourName}

**DAY 4**  
WHATSAPP

**Nudge - Human, non-pushy**

Hey {FirstName} not chasing 😊  
Just something I keep coming across with garages in {City}. Was curious how you deal with it on your end.

**DAY 5**  
EMAIL

**Solution Introduction - Connect problem to fix**

**SUBJECT LINE OPTIONS**

How some garages in {City} are handling this now  
One thing that's changed for workshops like yours

No missed calls, even when you're elbow-deep in an engine

#### EMAIL BODY

Hi {FirstName},

Quick update on what I've been seeing:

A few garages I work with decided to solve this once and for all.  
They set up an AI voice assistant that picks up every call even when the whole team is busy.

It books the job, collects the customer's details, and confirms the appointment automatically.  
No interruptions. No missed enquiries. The team just focuses on the work.

One garage in particular went from losing roughly 3 calls a day to zero and they haven't hired anyone extra.

Happy to show you how it works if you're curious. Takes about 10 minutes.

{YourName}

#### CONDITIONAL LOGIC

→ Opened → WhatsApp Day 6

**DAY 6**  
WHATSAPP

**Conversion Push**

#### IF COLD

Has anyone ever shown you how to make sure no service call gets missed, even when the whole workshop is busy?

#### IF ENGAGED

That's exactly what a few garages I work with set up.  
Every call gets handled automatically while they focus on the job.  
Want me to walk you through it quickly?

**DAY 7**  
CALL + WHATSAPP

**Warm Leads Only - Direct outreach**

#### AFTER CALL WHATSAPP

Tried reaching you earlier nothing urgent 😊

If it's useful, I can show you in 10 minutes how garages are handling calls without interrupting their workflow.  
Just let me know.

## NO EMAIL FLOW — WHATSAPP + CALL

### DAY 1 WHATSAPP

#### First Touch

Hi {FirstName}, quick question  
When you're busy working on a car at {GarageName}, what usually happens when the phone rings?

### DAY 2 WHATSAPP

#### Follow-Up

Just checking in been asking this to a few garages around {City}.  
Sounds like most find it hard to keep up during busy periods. Is it the same for you?

### DAY 3 CALL + WHATSAPP

#### Call Attempt

Tried calling nothing urgent 😊  
Was just curious how you handle incoming calls when you're tied up in the workshop.

### DAY 4 WHATSAPP

#### Value Layer

Worth knowing: most people who can't reach a garage don't try again.  
They call the next one. No message, no second chance.  
For a busy workshop, that's real revenue walking out the door.

### DAY 5 WHATSAPP

#### Solution Angle

Some garages now have every call answered automatically, even when everyone's busy on a job.  
No missed bookings, no interruptions.

Not sure if that's something you'd look at but it's making a real difference for a few places I work with.

**DAY 6**  
CALL / FINAL  
WHATSAPP

Close or Exit

All good if it's not the right time 😊  
If it ever becomes relevant, feel free to reach back out.

## 03 ARTISANS & TRADESPEOPLE

Placeholders: {FirstName}, {Trade} (plumber, electrician, roofer...), {City}, {YourName}

### WITH EMAIL + WHATSAPP FLOW

**DAY 1**  
EMAIL

Problem Trigger - On-site reality

#### SUBJECT LINE OPTIONS

When you're on a job, {FirstName}...  
Do you lose jobs to your phone?  
Quick question for {Trade}s in {City}

#### VERSION A — REAL SITUATION

Hi {FirstName},

Quick question for a {trade} working out in the field:

When you're on-site and your phone rings. Do you stop the job to answer, or let it ring?

I've been speaking with {trade}s across {City}, and the honest answer from most is:  
if both hands are busy, the call gets missed. And the customer? They've already called someone else by the time you get back to them.

Just wondering if that's something you deal with.

{YourName}

#### VERSION B — SHORT & PUNCHY

Hi {FirstName},

When you're on a job, do you still manage to answer most calls?

A lot of {trade}s I speak with don't and it ends up meaning missed work without ever realising it.

{YourName}

#### CONDITIONAL LOGIC

→ *Opened* → *WhatsApp Day 2*

→ *Not opened* → *Still WhatsApp Day 2 (don't wait)*

#### DAY 2 WHATSAPP

#### Conversation Entry - Simple and direct

#### IF COLD

Hi {FirstName}, it's {YourName} from Scintia CallFlow.

Quick one: when you're on-site, do you usually manage to pick up calls or call back later?

#### IF ENGAGED

Hey {FirstName} following up on my email.

Do you feel like you're missing quite a few calls when you're busy on a job?

#### DAY 3 WHATSAPP

#### Light Nudge

Hey {FirstName} not chasing 😊

Just something I keep hearing from {trade}s around {City}. Was curious how you deal with it.

#### DAY 4 EMAIL

#### Customer Frustration — Make it real

#### SUBJECT LINE OPTIONS

What your missed calls are actually doing

Why customers move on so fast

One thing most {trade}s don't track

#### EMAIL BODY

Hi {FirstName},

Something that keeps coming up in my conversations with tradespeople:

When someone needs a {trade} and can't get through, they don't wait.  
Especially in urgent situations a leak, a fault, a job that needs doing before the weekend.

They call the next number. Fast.

So the jobs you're not getting aren't the ones you turned down.  
They're the ones where the phone rang and you couldn't get to it.

That's really why I reached out.

{YourName}

**DAY 5**  
WHATSAPP

**Solution Push**

#### IF COLD

Some {trade}s are now making sure every call gets answered, even when they're mid-job.  
Not sure if that's something you would consider but it's meaning fewer lost enquiries.

#### IF ENGAGED

That's exactly what a few {trade}s I work with set up every call handled automatically while they're on-site.  
No missed jobs. No interruptions.  
Want me to show you how it works?

**DAY 6**  
CALL + WHATSAPP

**Warm Leads Only - Close**

#### AFTER CALL WHATSAPP

Tried calling quickly nothing urgent 😊  
If it's useful, I can show you how others are handling calls while working no missed jobs.  
Just say the word.

**NO EMAIL FLOW - WHATSAPP + CALL**

**DAY 1**  
WHATSAPP

**First Touch**

Hi {FirstName}, quick question  
When you're on a job, what usually happens when your phone rings?

**DAY 2**  
WHATSAPP

**Follow-Up**

Just checking in been asking this to a few {trade}s around {City}. How does it usually go for you?

**DAY 3**  
WHATSAPP

**Value Trigger**

What I keep seeing: people needing a {trade} urgently don't wait if no one answers.  
They call the next person immediately.

**DAY 4**  
CALL + WHATSAPP

**Call Attempt**

Tried calling earlier nothing urgent 😊  
Was curious how you deal with calls when you're busy on-site.

**DAY 5**  
WHATSAPP

**Solution Push**

Some {trade}s now make sure every call gets answered even while they're working.  
Not sure if that's something you'd ever look into.

**DAY 6**  
WHATSAPP

**Soft Exit**

All good if it's not relevant right now 😊  
Just thought it was worth asking.

## 04 MEDICAL CENTERS & CLINICS

Placeholders: {FirstName}, {ClinicName}, {City}, {YourName}

NOTE ON APPROACH: This sequence uses a 'researcher observing a pattern' framing. This persona is maintained through the entire sequence — do not break it before Day 5. The goal is to build curiosity and trust before introducing the solution.

### WITH EMAIL + WHATSAPP FLOW

**DAY 1**  
EMAIL

**Problem Awareness - Researcher framing**

#### SUBJECT LINE OPTIONS

Something I keep noticing at clinics like {ClinicName}  
A pattern I'm trying to understand  
Quick question, Is this happening at {ClinicName} too?

#### EMAIL BODY

Hi {FirstName},

I'm currently looking at how clinics manage patient call volumes during peak hours specifically what happens to calls that come in when reception is already occupied.

From what I've been observing, the issue isn't usually a staffing problem.  
It's a timing problem patients calling in exactly during the moments when no one can pick up.

I wanted to ask someone directly: is that something you notice at {ClinicName}?  
Does the front desk ever get to a point during the morning rush where calls simply can't be answered in time?

Just trying to understand if this is a widespread pattern or specific to certain clinic types.

{YourName}

#### CONDITIONAL LOGIC

- *Opened* → Continue normally to Day 2
- *Not opened* → Resend Day 3 with new subject line

**DAY 2**  
EMAIL

**Pattern Confirmation — Build the picture**

**SUBJECT: FOLLOWING UP ON THE PATTERN I'M MAPPING**

**EMAIL BODY**

Hi {FirstName},

Following up on my last message.

Based on responses I've been getting from clinics, one thing stands out:  
missed patient calls aren't random they cluster during specific windows.  
Monday mornings. Post-lunch. Right after opening.

Exactly when your front desk is at maximum capacity.

I'm trying to confirm whether that matches your experience at {ClinicName}, or whether your setup handles those peaks differently.

Not asking for anything genuinely trying to map where the friction sits.

{YourName}

**DAY 3**  
EMAIL

**Soft Insight Reveal - Validate the problem**

**SUBJECT: WHAT THE DATA IS TELLING ME**

**EMAIL BODY**

Hi {FirstName},

Based on what I've been seeing across clinics in the region, the pattern is fairly consistent:

When a patient calls and doesn't reach anyone, they rarely call back.  
They either try another clinic, delay their appointment entirely, or in some cases don't seek care at that point.

For the clinic, it looks like a quiet phone. In reality, it's appointments that never happened.

Does that match what you see at {ClinicName}?  
I'd genuinely be curious to hear your perspective whether it confirms what I'm finding or challenges it.

{YourName}

**DAY 4**  
WHATSAPP

**First Non-Email Touch — Professional tone**

#### IF NO EMAIL ENGAGEMENT

Hi {FirstName}, it's {YourName}, I sent you a couple of emails about patient call patterns at clinics. Quick question: when your front desk is busy with in-person patients, do incoming calls usually get answered or does it get difficult?

#### IF OPENED OR CLICKED EMAIL

Hi {FirstName} I could see you looked at my email about missed patient calls. Wanted to check: is the pattern I described something you recognise at {ClinicName}, or does your setup handle it differently?

#### CONDITIONAL LOGIC

→ No prior engagement → Keep soft, continue observational tone

**DAY 5**  
EMAIL

**Solution Introduction - Natural, not a pivot**

**SUBJECT: WHAT SOME CLINICS ARE DOING ABOUT THIS**

#### EMAIL BODY

Hi {FirstName},

To close the loop on what I've been researching:

Several clinics facing this exact issue — calls lost in those peak-hour windows — have started using an AI voice assistant to handle incoming calls when reception is occupied.

It answers instantly, books or modifies appointments, sends patients a confirmation, and flags anything that needs a human.

No changes to existing systems. HIPAA-compliant from day one.

The clinics using it have seen their missed appointment rate drop significantly — and the front desk can focus entirely on patients in the room.

If this is relevant to {ClinicName}, I'm happy to walk you through a real example. Takes about 10 minutes.

{YourName}

#### CONDITIONAL LOGIC

→ Opened → WhatsApp Day 6

**DAY 6**  
WHATSAPP

**Follow-Up — Short and direct**

Hi {FirstName} just checking in once.

If missed patient calls during busy hours is something that affects {ClinicName}, I can show you exactly how other clinics are handling it without adding staff.

Happy to jump on a call this week.

**DAY 7**  
CALL

**Warm Leads Only - Qualify and close**

**CALL SCRIPT**

Hi {FirstName}, this is {YourName} from Scintia CallFlow.

I've been in touch over the past week about patient call handling at clinics like {ClinicName}.

I wanted to ask directly: is managing call volume during peak hours currently a challenge for your team,

or have you found a system that works well?

[If yes, it's a challenge → move to demo]

[If no → thank them, note for future follow-up]

**NO EMAIL FLOW - WHATSAPP + CALL**

**DAY 1**  
WHATSAPP

**Formal Introduction**

Hi {FirstName}, it's {YourName} from Scintia CallFlow.

Quick question: when your front desk is busy with in-person patients, what usually happens to incoming calls?

**DAY 2**  
WHATSAPP

**Light Follow-Up**

Just checking in I've been asking this to a few clinics in {City}.

Most say peak hours are when it gets difficult to keep up. Is that the same at your clinic?

**DAY 3**  
CALL + WHATSAPP

**Call Attempt**

Tried calling earlier nothing urgent 😊

Was just curious how your clinic handles the call volume when the front desk is occupied with patients.

**DAY 4**  
WHATSAPP

**Value Layer**

Something worth knowing: when patients can't reach a clinic quickly, most don't call back. They either try elsewhere or delay the appointment.

For the clinic, it looks like a quiet morning. In reality, it's appointments that never happened.

**DAY 5**  
WHATSAPP

**Solution Angle**

Some clinics now make sure every patient call is answered instantly, even when reception is fully occupied.

It handles booking, confirmations, and routing automatically.

Not sure if that's something you'd consider but it's making a real difference for the ones using it.

**DAY 6**  
CALL / FINAL  
WHATSAPP

**Soft Close**

All good if this isn't the right moment 😊

If managing patient calls during peak hours ever becomes a priority, feel free to reach back out.
